1. The Elbe railroad bridge near Wittenberge is the only river crossing facility for Landkreis Priegnitz. The bridge serves both rail and road traffic, the latter using the space between the tracks. When a train is approaching the bridge is blocked for road traffic. A second track on the bridge has been laid but is not yet in use.
2. The bridge is guarded by the Volkspolizei. Passengers crossing the bridge were not checked for identity papers. \*

25X1A

25X1A [REDACTED] Comment. This combined railroad and road bridge was previously reported in detail. [REDACTED] The reconstruction of the second track

25X1A was also previously reported. [REDACTED]
